

International Journal of Applied Physics and Mathematics (IJAPM)

CONTENTS

Volume 3, Number 5, September 2013

The Construction of an Integral Formula for Computing Cylindrical and Non-Cylindrical Flow in the Region Bounded by Two Coaxial Cylinders of Varying Radii.....	316
<i>Vasos Pavlika</i>	
Crank-Nicolson Type Method for Burgers Equation.....	324
<i>Sachin S. Wani and Sarita H. Thakar</i>	
Extension of Some Common Fixed Point Theorems.....	329
<i>Krishna P. Patel and G. M. Deheri</i>	
Multiple Regression Analysis Using ANCOVA in University Model.....	336
<i>Maneesha and Priti Bajpai</i>	
Characterization of Proton Irradiation Effect in Semiconductor Material.....	341
<i>Haider F. Abdul Amir and Fuei Pien Chee</i>	
Investigation of Non-Cylindrical Flow in the Region Bounded by Two Coaxial Cylinders of Varying Radii....	345
<i>Vasos Pavlika</i>	
A Hybrid Algorithm for the Initialization of Wavelet Neural Networks: Application in Epileptic Seizure Classification.....	352
<i>Zarita Zainuddin, Kee Huong Lai, and Pauline Ong</i>	
Measure of Performance of Queuing Models and Behavior of Customers in Real Life Applications.....	359
<i>Priti Bajpai and Maneesha</i>	
The Theory of Von Klitzing's Constant and Phases.....	364
<i>Keshav N. Shrivastava</i>
